## Feature

- For medical electric equipment
- Internal dual fuses
- Low leakage current
- High power & peak power (option)
- Small and compact PCB construction
- Built-in inrush current, overcurrent and overvoltage protection circuits
- Harmonic attenuator (Complies with IEC61000-3-2 class A)
- Universal input (AC85-264V)
- Power factor correction

## Safety agency approvals

ANSI/AAMI ES60601, EN60601-1 3rd

## EMI

Complies with FCC-B, CISPR22-B, EN55011-B, EN55022-B, VCCI-B

## 5-year warranty

## CE marking

Low Voltage Directive  
RoHS Directive

## EMS Compliance

Be attention not to bump against the attached area by vibration.
- ※ Use the spacer of 8mm length or more regarding insulation.  
And do not use press-fitting bush.
- ※ Point A, Point B, Point C are thermometry points.

5	FG				

※ Keep drawing current per pin below 5A for CN2,CN3.

- ※ Tolerance :  $\pm 1$  [ $\pm 0.04$ ]
- ※ Weight : 540g max (with chassis & cover : 860g max)
- ※ PCB material : CEM3
- ※ Optional chassis and cover material : Electric galvanizing steel board.
- ※ Dimensions in mm, [ ] =inches
- ※ Mounting torque (Mounting hole of chassis) :  $1.5N \cdot m$  (16kgf · cm) max

Assembling and Installation Method

Installation method

■ This power supply is manufactured by SMD technology. The stress to P.C.B like twisting or bending causes the defect of the unit, so handle the unit with care.

■ In case of metal chassis, keep the distance between d1 & d2 for to insulate between lead of component and metal chassis, use the spacer of 8mm or more between d1. If it is less than d1 & d2, insert the insulation sheet between power supply and metal chassis.

■ There is a possibility that it is not possible to cool enough when the power supply is used by the sealing up space as showing in right figure. Please use it after confirming the temperature of point A and point B of Instruction Manual 3.

■ (F) mounting is not possible when unit is with case cover, but if need to operate unit by (F) positioning with case cover, temperature / load derating is necessary. For more details, please contact our sales or engineering departments.

Mounting screw

■ The mounting screw should be M3. The hatched area shows the allowance of metal parts for mounting.

● LMA100F, LMA150F

● LMA240F

■ If metallic fittings are used on the component side of the board, ensure there is no contact with surface mounted components.  
 ■ This product uses SMD technology. Please avoid the PCB installation method which includes the twisting stress or the bending stress.  
 \* Recommendation to electrically connect FG to metal chassis for reducing noise.

Derating

Derating curve for input voltage

LMA100F Ambient temperature derating curve (Reference value)

LMA150F Ambient temperature derating curve (Reference value)

LMA240F Ambient temperature derating curve (Reference value)

Output voltage	Output power[W]	
	①Convection	②Forced air
24V	240.0	300.0

- The operative ambient temperature is different by with / without chassis cover or mounting position.  
Note: In the hatched area, the specification of Ripple, Ripple Noise is different from other area.
- Make sure the temperature at point A and point B is less than the temperatures shown in Instruction Manual 3.
- The ambient temperature should be measured 5 to 10 cm away from the power supply so that it won't be influenced by the heat from the power supply. Please consult us for more details.
