Notes

1. Ripple and noise is the maximum peak-to-peak voltage value measured at the output with 20 MHz bandwidth, at rated line voltage and output load, and with a 10 μ F tantalum capacitor in parallel with a 0.1 μ F ceramic capacitor.
2. All models may be operated at no-load without damage. At no load, output voltage fluctuates beyond 5% due to burst-mode operation of the control IC for energy saving.
3. Peak current available for 15s max, 10% duty cycle, average power not to exceed nominal power rating.
4. For single fuse option add suffix -SP, e.g. PBR650PS12C-SP
